

Rabbit antibody to CBY3

| Unit size100 µlImmunogenA synthetic peptide from the n-terminal region of human Protein chibby homolog 3 (CBY3) conjugated to an immunogenic carrier protein was used as the antigen.ConjugateUnconjugated antibodyAlso knownProtein chibby homolog 3, CBY3HostNZ white rabbitPurityWhole serumClonalityPolyclonalIsotypePolyclonal, whole serumApplicationsIHC, WB. A dilution of 1: 300 to 1: 2000 is recommended. The optimal dilution should be determined by the end user. Not yet tested in other applications.SpecificitySpecific for CBY3.Specs X-react.Human. Other species not yet tested.FormatLyophilisedReconstitutionReconstitute in 100 µl of sterile water. Centrifuge to remove any insoluble material.StorageMaintain the lyophilised/reconstituted antibodies frozen at -20°C for long term storage and additional stability. Avoid freeze and thaw cycles.Expiry Date12 months after reconstitutionShippingThis item will be shipped to you at ambient temperature in a lyophilised form.LimitationFor research use only | Code ID Tag Unit size | OSC00160W Rb1015-280609-WS |
