

Rabbit antibody to HGS

Code	OSH00025W
ID Tag	Rb465-150608-WS
Unit size	150 µl
Immunogen	A synthetic peptide from the c-terminal region of mouse HGS (Hepatocyte growth factor-regulated tyrosine kinase substrate) conjugated to an immunogenic carrier protein was used as the antigen. The peptide is homologous in human and rat.
Conjugate	Unconjugated antibody
Also known	Hepatocyte growth factor-regulated tyrosine kinase substrate, HRS
Host	NZ white rabbit
Purity	Whole serum
Clonality	Polyclonal
Isotype	Polyclonal, whole serum
Applications	IHC, WB (confirmed by recombinant protein). A dilution of 1: 200 to 1: 2000 is recommended. The optimal dilution should be determined by the end user. Not yet tested in other applications.
Specificity	Specific for HGS.
Spcs X-react.	Human, rat mouse. Other species not yet tested.
Format	Lyophilised
Reconstitution	Reconstitute in 100 µl of sterile water. Centrifuge to remove any insoluble material.
Storage	Maintain the lyophilised/reconstituted antibodies frozen at -20°C for long term storage and refrigerated at 2-8°C for a shorter term. When reconstituting, glycerol (1:1) may be added for an additional stability. Avoid freeze and thaw cycles.
Expiry Date	12 months after reconstitution
Shipping	This item will be shipped to you at ambient temperature in a lyophilised form.
Limitation	For research use only
