

Rabbit antibody to FGF2

 Code
 OSG00014W

 ID Tag
 Rb476-290608-WS

Unit size 150 ul

Immunogen A synthetic peptide from human basic FGF conjugated to blue carrier protein was used as the

antigen. The peptide is homologous in many other species including mouse and chicken.

Conjugate Unconjugated antibody

Also known BFGF, FGFB, HBGF-2, prostatropin

Host NZ white rabbit
Purity Whole serum
Clonality Polyclonal

Isotype Polyclonal, whole serum

Applications IHC, WB. A dilution of 1:300 to 1:2000 is recommended. The optimal dilution should be

determined by the end user. Not yet tested in other applications.

Specificity Specific for FGF2.

Spcs X-react. Human, mouse. Other species not yet tested.

Format Lyophilised

Reconstitution Reconstitute in 150 ul of sterile water. Centrifuge to remove any insoluble material.

Storage Maintain the lyophilised/reconstituted antibodies frozen at -20C for long term storage and

refrigerated at 2-8C for a shorter term. When reconstituting, glycerol (1:1) may be added for an

additional stability. Avoid freeze and thaw cycles.

Expiry Date 12 months after reconstitution

Shipping This item will be shipped to you at ambient temperature in a lyophilised form.

Limitation For research use only

IHC on paraffin sections of human rectum using Rabbit antibody to FGF2 (150-200): OSG00014W.

HIER: 1 mM EDTA, pH 8 for 20 min using Thermo's PT Module

Detection was done using Novolink HRP polymer from Leica following manufacturer's instruction

Primary antibody: dilution 1: 1000, incubated 30 min at RT (using Autostainer)

Sections were counterstained with Harris Hematoxylin.
